

Vivek Babar

Full Stack Developer — AI/ML Specialist

+91 8421665382 • vivekbabar020@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#)

About Me

Full Stack Developer and AI/ML Specialist proficient in building end-to-end web applications using the MERN stack (React.js, Node.js, Express.js, MongoDB). Possessing a comprehensive skill set in Data Science, Machine Learning, Deep Learning, and Natural Language Processing (NLP), with experience in developing advanced systems like multimodal LLMs and chatbots using deep learning techniques. Actively solving algorithmic challenges on LeetCode and seeking a challenging role to leverage both web development expertise and AI-driven applications to contribute to high-impact projects.

Education

G H Raisoni College of Engineering and Management, Pune

Bachelor of Technology (B.Tech) in Information Technology

Location: Wagholi, Pune

2023 – 2027

Savitribai Phule Pune University

Skills

- **Fullstack Development:** Frontend (HTML, CSS, JavaScript, React.js, Bootstrap, Tailwind CSS), Backend (Node.js, Express.js, Rest APIs)
- **Databases:** MongoDB, SQL
- **Programming & OOP:** Python, JavaScript, Java, C++, OOP Principles
- **Data Science & Machine Learning:** Data Analysis (Pandas, NumPy, Matplotlib, Seaborn), Machine Learning (Scikit-learn, Regression, Classification, Clustering)
- **Deep Learning:** TensorFlow, Keras, PyTorch, CNNs, RNNs, LSTMs, GANs, ANN
- **System & Networking:** Linux (Ubuntu), Windows 10/11, Shell Scripting, Terminal Commands, System Administration, Computer Networks (OSI Model, TCP/IP, Routing, Subnetting, Protocols)
- **Tools & Platforms:** Git, GitHub, VS Code, OpenAI API

Projects

AI & Machine Learning Projects

- **Enhancing GPT-OSS with Vision for ISRO EO Data** — [GitHub](#)
Open-source multimodal LLM developed for Earth Observation (EO) image analysis and structured report generation.
- **AI Chatbot Development** — [GitHub](#)
Built an intelligent chatbot using ANN and CNN models with TensorFlow and Keras. Utilized NumPy and Pandas for data preprocessing, along with Matplotlib and Seaborn for comprehensive training data visualization.
- **Facial Expression Recognition** — [GitHub](#)
Implemented a CNN-based deep learning system capable of detecting emotions (such as smile, angry, sad) in real-time from a live camera feed.
- **Voice-Controlled AI Assistant** — [GitHub](#)
Developed an AI voice assistant to launch applications like YouTube and Google via speech commands. Successfully integrated automated speech recognition with core chatbot functionality.

Full Stack Projects

- **Smart Crop Advisory AI Platform** — [Live Application](#)
Developed a specialized AI platform providing farmers with crop, pest, and fertilizer advice in their local languages to bridge accessibility barriers.
- **Voice-Controlled E-Commerce Login** — [GitHub](#)
Built an interactive OpenCart-style e-commerce portal enhanced with native speech recognition features for hands-free login and accessibility.
- **Interactive Endless Runner Game** — [GitHub](#)
Designed and engineered a fully responsive, lightweight arcade-style endless runner game utilizing pure HTML, CSS, and modern JavaScript.

Achievements and Certificates

- **LeetCode Problem Solver:** Solved 200+ algorithmic problems, sharpening data structures and algorithm skills. — [Profile Link](#)
- **Data Structures, Algorithms & Full Stack Web Development:** Complete Certificate from Apna College.
